Terms of use for the logo "approved input for organic production" by EASY-CERT services GmbH

The logo "approved input for organic production" is a trademark protected logo. Products that have been positively evaluated by EASY-CERT services GmbH Organic Inputs Evaluation (in the following: ECS Organic Inputs Evaluation) and are listed in the input database on www.betriebsmittelbewertung.at may be labelled with the logo "geprüftes Betriebsmittel für Bio" (= approved input for organic production). These products are permitted for use in organic production. Basis for the evalutation is the regulation (EU) No 2018/848 as amended

In addition to the logo, the following text can be chosen for the labelling:

This product has been approved by EASY-CERT services Organic Inputs Evaluation on the basis of Regulation (EU) No. 2018/848 as amended and may be used in organic production.

The logo "approved input for organic production" may be used under the following conditions:

- The logo may exclusively be used for listed products and in the provided version. It may be used on product labels, packaging of products and for product-related advertising.

- The use of the logo is free of charge. However, the company must send a sample label, an example of the packaging, the advertising brochure and the link of the website of the logo's use to ECS Organic Inputs Evaluation.

- The logo may not be used for certified organic products such as certified organic feed or certified organic ingredients. These products are subject to different labeling regulations (code number, EU organic logo etc.). For more information, please contact your organic inspection body.

- The respective legal provisions for labeling of the products must be observed.

- By complying with the general terms and conditions, the company is obliged to use the logo correctly. In the event of improper use of the logo, the provisions set out in the general terms and conditions apply.

Graphic requirements for using the logo

The logo should be clearly visible and should be at least 15 mm in size.
